

Train Guide Support

Boost Human is a software development company headquartered in El Paso, Texas. We provide software implementation, deployment, and maintenance across many electronic devices, including but not limited to personal computers (Windows, Mac, and Linux), mobile devices (iOS and Android), and mixed reality devices (Oculus, HTC VIVE, HoloLens, Vuzix). We focus on leveraging artificial intelligence and mixed reality to develop training applications, augmented telecommunications, and digitizing curriculum for higher education or enterprise users.

Digital reality tools allow users to learn by doing. With Telepresence, experts can share their knowledge with others, and learners can receive immediate support, anywhere, anytime.

We enable accelerated knowledge transfer. We combine these modalities of learning into immersive experiences. The results are learning, which is deeper, faster, and retained longer. The outcomes equal increased productivity.

The team at Boost Human is committed to going above and beyond to help our region by volunteering, teaching and contributing our talent and technology, working alongside non-profits, government, universities, schools, and the private industry on multiple initiatives that help our communities.

TELEPRESENCE

Self-contained (downloadable) software solution for teleconferencing through interactive, multimedia, cross-platform augmented reality (AR) devices.

VIRTUAL HUMANS

Hololens, Vuzix, Oculus, and HTC VIVE development (virtual and augmented reality).

SOFTWARE DEVELOPMENT, IT, AND CONSULTING

Web, mobile, and applications development for a variety of platforms in a variety of languages. Installation of hardware and software infrastructure. Software and hardware development and deployment consulting. Custom solutions for training, workforce development, or productivity software.

VIRTUAL TRAINING

Providing a virtual reality software solution for training, evaluation, and repeatability and reproducibility (R&R). Digitalization of training materials, development of new training materials, and development of evaluation and assessment tools.

DATA ANALYTICS / ARTIFICIAL INTELLIGENCE

Data collection and analytics. Database management services. Neural networks and machine learning for structured and unstructured data.

It is our goal to empower employees through better training, communications, and technology-assisted skill development to improve efficiency and productivity, creating a rapid yet sustainable ROI for the organizations.
