

TRAIN GUIDE SUPPORT

Boost Human is a software development company headquartered in El Paso, Texas. We provide software implementation, deployment, and maintenance across many electronic devices, including but not limited to personal computers (Windows, Mac, and Linux), mobile devices (iOS and Android), and mixed reality devices (Oculus, HTC VIVE, HoloLens, Vuzix). We focus on leveraging artificial intelligence and mixed reality to develop training applications, augmented telecommunications, and digitizing curriculum for higher education or enterprise users. We have a balanced team of software engineers, computer scientists, electrical engineers, and researchers with post-graduate education.

Boost Human

TELEPRESENCE

Self-contained (downloadable) software solution for teleconferencing through interactive, multimedia, cross-platform augmented reality (AR) devices.

SOFTWARE DEVELOPMENT, IT, AND CONSULTING

Web, mobile, and applications development for a variety of platforms in a variety of languages. Installation of hardware and software infrastructure. Software and hardware development and deployment consulting. Custom solutions for training, workforce development, or productivity software.

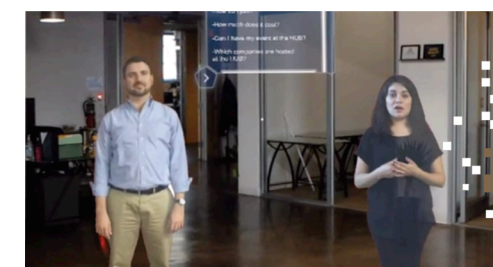

VIRTUAL TRAINING

Providing a virtual reality software solution for training, evaluation, and repeatability and reproducibility (R&R). Digitalization of training materials, development of new training materials, and development of evaluation and assessment tools.

DATA ANALYTICS / ARTIFICIAL INTELLIGENCE

Data collection and analytics. Database management services. Neural networks and machine learning for structured and unstructured data.

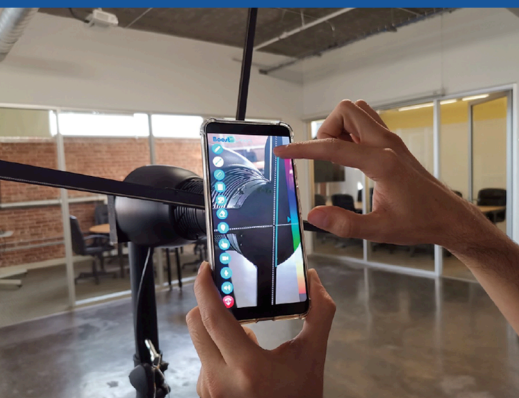

VIRTUAL HUMANS

HoloLens, Vuzix, Oculus, and HTC VIVE development (virtual and augmented reality).

WHAT WE OFFER

Boost Human develops enterprise mixed reality and artificial intelligence software for workforce development, productivity, and next-gen telecommunications.

Boost productivity, boost efficiency, boost your workforce.

Boost-Human

Boost Productivity, Boost Efficiency, Boost Your Workforce

MANUFACTURING

We provide augmented reality, hands-free digital assistance throughout their processes, creating holographic tools that guide workers step-by-step across complex operations, empowering the workforce to improve, learn, and do more, better, faster.

GOVERNMENT

We offer augmented reality enhanced teleconferencing services to reduce travel costs and operation times of departments that require expert assistance on-site, verification, and knowledge transfer.

HEALTHCARE

We create training software to avoid dangerous real-world scenarios by recreating situations digitally. Medical schools and healthcare providers are using our virtual patients for soft-skills and diagnosis training.

EDUCATION

We offer software tool-sets for students of technical institutions or universities to enhance their learning experiences with a focus on medical training and telecommunications.

It is our goal to empower employees through better training, communications, and technology-assisted skill development to improve efficiency and productivity, creating a rapid yet sustainable ROI for the organizations.

REVOLUTIONIZING WORKFORCE DEVELOPMENT THROUGH AR/VR APPLICATIONS

Boost-Human

Boost Human provides software services for government and military, manufacturing, healthcare, and education. At our core we leverage emerging technologies to assist companies in their digital transformation for workforce development.
